

PATTERNS

PATTERN LIST

General

- Put filters on the header of the table
- On Group Column show Group Code and Description
- Notes field is not correct, on the Pattern table should be one field "pt_note" which is a kind of extended description of the pattern. This is the field that should be shown here.
- Error on show sketch

Code	Group	Description	Date	Update	Notes	Sketch
0110	TS	T-Shirt Ranglan Match	08-08-2016	13-09-2016	Nota afegida a posterioritat un dia de pluja...	PT_NOTE

PATTERN INFORMATION

General

- Need button to return to list

Pattern Detail

- Add field "Pt_Notes"
- Group of Product; Show Code + Description
- Move **Notes** to a new tab. The same we did on Projects and follow the same structure to input and view data.
- I can't delete an image
- Sketch image is not visible
- Put a return to list Button

- Can we make the view of the image bigger ?

Pattern Parts

- As a general rule I don't like the screens where we have the edit screen next to the list screen. I prefer to see a list and if we need to edit or create a record then I get a screen with this information, if we have to edit small data it can be a pop up. When finish edit then go back to the list.

- Show Parts Image
- No need multiple language here, just 2 fields; Description in English and Description in Vietnamese
- "Create" button" to add new Part

Pattern Variation

- Same as before, I need one screen with the Parts Image + the list

Pattern Vari List

VAR. Code	Description	Parts	Sketch	
RR	rr	RRR		
RT	sdfsdf	SDFSDF		

Showing 1 to 2 of 2 entries

- “Create” button” to add new Variation
- No need Description on multiple language
- Now I can’t edit the Code once it is created. I should be able to do it.
- I can’t see the images
- When I edit or put some new information it don’t update.
