

## PRICE LIST ZONE

### PRICE LIST ZONE

#### General

- Put filters on the header of the table

#### Create

- Seems works fine, but we have to change the Currency Exchange system.
  - 1- PL Factory Currency : Write the PL Factory Currency + Write the conversion value based on Currency Convert List (v1)
  - 2- Agent Price List Currency: Write the Agent Price List Currency + Write the conversion value based on Currency Convert List (v2)
  - 3- Exchange value : This is the final exchange value from Factory Currency to Price List Currency. To get this value (v3) we have to calculate as follows  $v3=v1/v2$
  - 4- Exchange Value Manual : This is the value that we will put manually (v4) and this is going to be the exchange rate we will use for the calculation of the Price List.

#### Create by copy

- As we are going to duplicate one PL, then once we write the new name and description, and select the source Price List we should not be able to select anything else, just proceed to duplicate the selected Price List under the new name and description. (If any data has to be changed, we will do later on, on the edit screen)

The screenshot shows the 'factory1/PEPSI - Factory Admin' interface. On the left, a table titled 'Price List Zone' lists existing price lists with columns: CODE, DESCRIPTION, SEASON, and PRLIST. The table shows 7 entries, with the first one being '2016-DD' with description 'Create'. A 'Showing 1 to 7 of 7 entries' message is at the bottom of the table.

In the center, a 'Create' form is displayed. It has fields for: Code (2016-DD-Copy), Description (Create By Copy), Season (2016), Source Price List (2016-DD), Source Currency (EUR), Price List Currency (Choose), Calculation Date Ex.Rate (1USD), Calculation Ex.Rate (1USD), Correction (%), Commission (%), Freight (currency/Kg), Taxes (%), Margin (%), and Language (Choose). At the bottom of the form are 'Add/Update' and 'Refresh' buttons. A large red 'X' is drawn over the form, indicating that the 'Create by copy' functionality is not working as intended.

On the right, a table titled 'Create By Copy' is shown. It has columns: DATE, CORRECTION, COMMISSION, FREIGHT, TAXES, MARGIN, and LANGUAGE. The table shows 10 entries, with the first one being '09-08' with correction 5.00, commission 20.00, freight 4.50, taxes 21.00, margin 25.00, and language Catala. A 'First Previous 1 Next Last' pagination bar is at the bottom of the table.

## PRICE LIST ZONE DETAIL

### Price List Zone Information

- The general view and functions of this screen is different than Price List Zone. This is not a major problem but it is confusing on the beginning.
- Don't allow to change Price List Factory (This can be selected only when creates a new PL)
- Put a Return button to Price Lists screen
- Show same info of currencies as when create the PL
- The "+" button doesn't works, would be interesting to allow to hide or minimize this part.

### Price List Zone Detail

- Put two buttons "Resset Agent Prices" and "Resset Recommended". When click on those buttons we have to replace all manual prices with the calculated values. Put a confirmation step before proceed.
- Group columns of prices and currency on FTY sell prices
- Put Price List currency on the money values (SELL CALC, AGENT SELL PRICE, RECOMMENDED, RECOMMENDED)
- Show descriptions of Items and Versions on the language of the Price List
- Round all calculations to 2 decimals and discard the rest. When show values don't round them. Write the value exactly as it is. This is to be applied to all price calculations of the ERP

Note: I had no time to check the calculations of this screen yet

## Edit manual values

- Add Weight on the screen (Weight is a value that should be copied from Cost Code Version filtered by the season of the PL)
- ERROR when save edited prices
