COST LIST

Costing information

- Put Product Code + Type Product Description in one column [Done](#)
- Put Customer Code + Customer Name in one column [Done](#)

Create

- I can create new records but only one by one. I need to create codes by copy ALL codes from "Type of product" (we already talk about) [Done](#)

Create by copy

- Error when try to copy ALL codes from one season. After click on copy I see that the source season changes and appear Error notification. [Fixed](#)

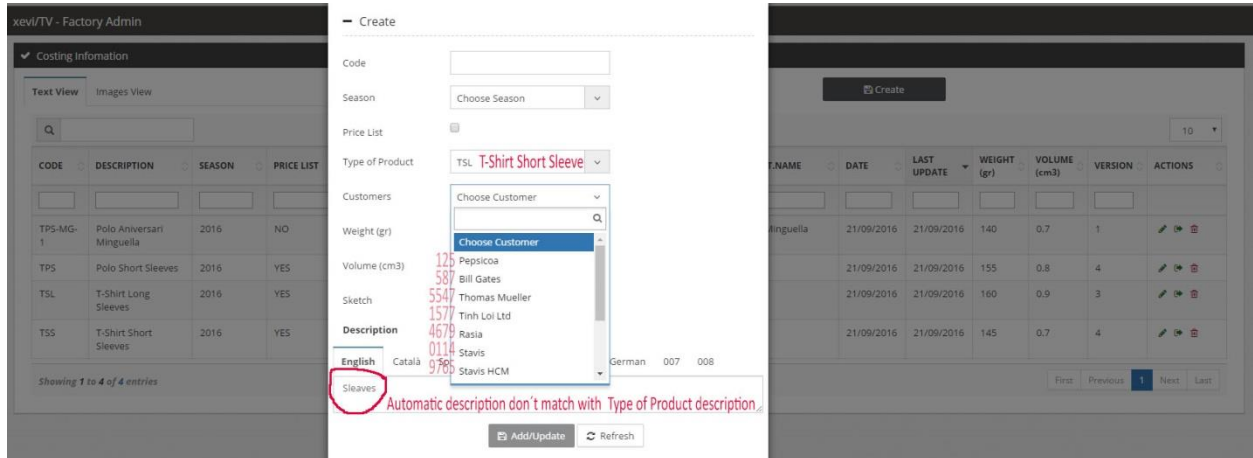

The screenshot shows the 'MENT TOOL' interface. A 'Copy data' dialog box is open, with the 'Source' dropdown set to '{lang.SEASON}' (circled in red with a question mark) and the 'Destination' dropdown set to '2017'. There are buttons for 'All Codes' and a 'Copy' button. A notification bar at the top right says 'Notification undefined' with a checkmark. The background shows a table with columns: CODE, DESCRIPTION, SEASON, PRICE LIST, and various product details.
